

# PetScape Your Yard!

Create a safe & functional area for your four legged friends to run, play, explore and answer the 'call of the wild'.

## Add

- Paths/places to run or patrol
- An area for 'nature calls'
- Shade and shelter

## Remove

- Thorny or spiny plants
- Mushrooms
- Foxtail grasses & other dangerous weeds

## Naturally Keep Dogs Away...

- Install fencing
- Plant Citronella (mint family)
- Scatter citrus peels
- Plant densely and wisely
- Plant Rue (evergreen shrub)
- Sprinkle cayenne / red pepper

## DANGER! DANGER!

Even organic chemicals (herbicides, pesticides and fertilizers) can be toxic to your pets. It is the nature of most animals to chew, dig, rub up against, and roll around on vegetation. Because of this natural behavior, chemicals can be inhaled, ingested or absorbed through the skin even after they have dried or been taken up by the plant or its roots.

### Toxic Plants and Yard Chemicals:

<i>Azalea</i>	<i>Blood Meal / Bone Meal</i>	<i>Blue Green Algae</i>
<i>Daffodil</i>	<i>Lily- Day and Easter</i>	<i>Mushroom</i>
<i>Oleander</i>	<i>Rat Poison</i>	<i>Slug/ Snail Bait</i>

For more information, contact your pet's veterinarian.
